## DETAILED ACTION

### *Specification*

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

### *Claim Rejections - 35 USC § 101*

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claim 9 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claim 9 claims a medium, but does not indicate that it is a computer readable medium.

### *Claim Rejections - 35 USC § 112*

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 2-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claims 2, 8, and 9 (the independent claims) all claim giving an instruction to stop the high speed tape transport when the counter display reads the same value as in the target stop position but the tape position as indicated by the positioning signals is short of the target stop position. Therefore, how can the

Art Unit: 2616

apparatus give the instruction to stop the high speed tape transport when the counter display reads the same value as in the target stop position, but still fall short of that same point even though it was given the instruction to stop there once it had reached that point.

***Allowable Subject Matter***

5. Claim 1 is allowed.

6. The following is an examiner's statement of reasons for allowance: prior art fails to teach or fairly suggest a video deck wherein after recording is over, it controls the tape drive mechanism to fast-rewind until the "29" or less, and controls the tape drive mechanism to give an instruction to stop the fast-rewinding; after the tape stops running, it controls the tape drive mechanism to fast-forward until the signal input/output head reads a control signal three times and also the recording start position is 1 sec. or less, and then instructs the tape drive mechanism to stop fast-forwarding, to thereby offset the tape overrun caused by fast-rewinding.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
